

GRIPS-LITE®

Model JD6612

GRIPS-LITE® is a compact and light weight ice and snow walking device that fits easily and conveniently over all types of shoes and boots. The unique Transitional Traction® of GRIPS-LITE® comes from the sandpaper-like aluminum oxide grit.

The sandpaper-like grit offers a level of traction greater than that of normal rubber soled shoes. GRIPS-LITE® is designed to keep your employees safe both indoors and out without the need to take them off. The grit is also non-sparking and non-conductive and designed for industrial environments.
